in.k450
Compact full-function keypad for in.xm & in.xe spa systems

Aeware’s new series of keypads features a large LCD display and slightly raised keys that let users control all spa system functions and programming directly from spa side. In.k450 comes with a customizable overlay in an easy to install waterproof plastic enclosure designed to maximize user experience.
function description

- "On/Off" key
- "Pump 1" key
- "Pump 2" key
- "Pump 3 / Blower" key
- "Light" key
- "Up/Down" keys
### Pumps icon
The "Pump" indicator numbers light up and their icons become fast animated when pump or blower are in high speed, slower animated icon when pump or blower are in low speed.

### RS icon
A problem has been detected. Do not enter the water! Spa service is required.

### Light icon
The "Light" icon lights up when the light is on. The icon's number of rays is proportional to the light's intensity.

### Progress bar
A visual indication of the time remaining before an equipment is turned off or before the end of the standby mode.

### Heater icon
The "Heater" icon lights up when the heater is on. It flashes when:
1- there is a call for heat and heater has not started yet,
2- heater has just turned off and element is cooling down or
3 - not enough current available to start heater

### AM/PM (˚F/ ˚C)

### Filter Cycle icon
The "Filter Cycle" icon lights up when filter cycle is on.

### Smart Winter Mode icon
The "SWM" icon automatically turns on when freeze protection is active. It flashes while system purges the spa plumbing.

### Set Point icon
The "Set Point" icon automatically turns on when set point setting menu is activated. (SP message on display).
Drilling template

- Drill 2x $\varnothing3/8"$
- 2x $\varnothing9$ mm

Follow profile with jig saw
Installation in.k450 with adhesive

The keypad should be installed directly onto the spa (or very close to it) so that it is easily accessible to the user.

- Using the drilling template supplied with the unit, determine the mounting location and then stick the template on the location.

- Drill two 3/8” (9 mm) diameter holes at 6 7/32” (158 mm) from center to center, in the exact position according to the drilling template.

- Cut out and remove the material between the two holes following the profile with a jig saw (see illustration).

- Clean the installation surface and peel the adhesive gasket from the back of the keypad.

- Insert keypad and align it correctly, then secure it properly in place by using the two wing nuts provided.

in.k450 for in.xe spa systems

user instructions and functions
On/Off key

Depending on the spa manufacturer, this key may have different functions: On/Off, Standby mode or quick enable of the Economy mode.

On/Off Mode

By default, the system is always on. Press and hold On/Off key for 5 sec. (or Press and hold Pump 1 key for 5 sec.) to shut the system down for 30 minutes. The display will toggle between the “OFF” message and water temperature. Press On/Off key to restart the system before the expiration of the 30 minutes delay.

Standby Mode

Quick press and release the On/Off key to shut the system down (i.e. to set it to Standby mode) for 30 minutes. The display will toggle between the “SBY” message and water temperature. All keys are then disabled, unless you press On/Off key again to reactivate the system before the expiration of the 30 minutes delay.

In order to warn the user, the spa light will flash for a few seconds before the exit of Standby mode.

Economy Mode

This mode allows you to lower the temperature set point of the spa by 20 °F (11 °C) during a certain period of the day.

To enable the economy mode: Press and hold On/Off key for 10 sec.

While the Economy mode is enabled the display will toggle between “Eco” and the water temperature. Once the system goes back to normal mode, the display will show “noE”.

* If single speed pump: press Pump key to turn pump on. Press Pump key again to turn pump off.
functions and user instructions

Pump 2 key

Press **Pump 2** key to turn Pump 2 on. Press a second time to turn pump off.

A built-in timer automatically turns pump off after a predetermined period of time, unless pump has been manually deactivated first.

Blower key

Press **Blower** key to turn blower on. Press a second time to turn blower off.

A built-in timer automatically turns blower off after a predetermined period of time, unless blower has been manually deactivated first.

Light key

Press **Light** key to turn light on at high intensity. Subsequent presses change light intensity. A last press turns light off.

A built-in timer automatically turns light off after a predetermined period of time, unless it has been manually deactivated first.

Up/Down keys

Use **Up** or **Down** key to set desired water temperature. The temperature setting will be displayed for 5 seconds to confirm your new selection.

The "Set Point" icon indicates that the display shows the desired temperature, NOT the current water temperature!
Program key

Use Program key to display time or enter Programming menu by pressing and holding key. In Programming mode, the following parameters can be set: time, filter cycle start time, filter cycle duration, filter cycle frequency, and temperature unit.

Note: Light key is used as Program key if this key is not present.

Setting the time

Enter Programming mode by holding Prog. key pressed down for 3 sec. The display will show the current time setting.

Setting the hour: Use Up or Down arrows to change hour setting (AM/PM).

Setting the minutes: Press Prog. key a second time.

Use Up or Down key to change hour setting.

Setting filter cycle start time

To program the filter cycle, you must enter these parameters: the start time, duration and frequency. During a filter cycle, pumps run for one minute to purge the plumbing, then Pump 1 runs for the programmed number of hours.

Press Prog. key a third time. The display will show FSxx, with "xx" representing the starting hour.

Use Up or Down key to change setting.

Setting filter cycle duration

Press Prog. key a fourth time.

The display will show Fdxx, with "xx" representing the duration in hours.

Use Up or Down key to change setting.
Filter cycle frequency

Press **Prog**. key a fifth time.

The display will show FFxx, with "xx" representing the number of filter cycles per day (up to 4).

Use **Up** or **Down** key to change setting.

Setting economy mode*

Press **Prog**. key a sixth time. Use **Up** key to enable the economy mode, the display will show EP 1 or use **Down** key to disable economy mode, the display will show EP 0.

Setting economy start time*

Press **Prog**. key a seventh time. The display will show ESxx, with "xx" representing the starting hour.

Use **Up** or **Down** key to change setting.

Setting economy duration*

Press and hold **Light** key until the display shows Edxx, with "xx" representing the duration in hours. (Default: 2 hours).

Use **Up** or **Down** key to change setting.

0 = no filtration

24 = continuous filtration

1 It's not recommended to set this to "0".

* Note that the parameters for the economy mode settings are associated to specific low level configuration of the system that are not present in all software revisions.
Setting temperature unit

Water temperature can be displayed in either Fahrenheit (°F) or Celsius (°C). Press **Prog** key a ninth time. The display will show either °F or °C.

Use **Up** or **Down** key to change setting.

Press **Prog** key once more to go back to normal mode.

Note: "F" will be displayed in in.xe Spa Packs.

Smart Winter Mode

Our Smart Winter Mode protects your system from the cold by turning pumps on several times a day to prevent water from freezing in pipes.

Water temperature regulation

In a regulation cycle, the system first generates water flow through the heater housing and the plumbing, in order to ensure accurate water temperature readings as well as avoiding heater activation in dry conditions.

After verifying pump activation and taking a water temperature reading if required, the system automatically turns the heater on to reach and maintain water temperature at Set Point.

Cooldown

After heating the spa water to the desired Set Point, the heater is turned off, but its associated pump (Pump 1 Low-speed or CP) remains on for a predetermined period of time to ensure adequate cooling of the heating element, this prolongs its useful life. The heater icon flashes during this time.

user instructions and functions
On/Off key

Depending on the spa manufacturer, this key may have different functions: On/Off, Standby mode or quick enable of the Economy mode.

Standby Mode*: Use On/Off key to pause all pumps.* Progress bar will display the remaining time before the system automatically exits Standby mode (user can also exit Standby mode at any time by pressing again on On/Off key).

* Pump will stay turned on if there is a request for more heat.

Economy Mode

This mode allows you to lower the temperature set point of the spa by 20 °F (11 °C) during a certain period of the day.

Press and hold the On/Off key for 10 sec. to enable the Economy mode. Repeat operation to disable it.

While the Economy mode is enabled the display will toggle between “Econ” and the water temperature. Once the system goes back to normal mode, the display will show "noE" for 3 sec.

* If single speed pump: press Pump key to turn pump on. Press Pump key again to turn pump off.

Pump 1 key

Press Pump 1 key to turn Pump 1 on at low speed. Press a second time to turn pump to high speed (with a dual-speed pump). A third time turns pump off.

A built-in timer automatically turns pump off after a predetermined period of time, unless pump has been manually deactivated first.
Press **Pump 2** key to turn Pump 2 on at low speed. Press a second time to turn pump to high speed (with a dual-speed pump). A third time turns pump off.

A built-in timer automatically turns pump off after a predetermined period of time, unless pump has been manually deactivated first.

Press **Pump 3/Blower** key to turn Pump 3/Blower on. Press a second time to turn pump or blower off.

A built-in timer automatically turns pump/blower off after a predetermined period of time, unless pump has been manually deactivated first.

Press **Light** key to turn light on at high intensity. Subsequent presses change light intensity. A last press turns light off.

A built-in timer automatically turns light off after a predetermined period of time, unless it has been manually deactivated first.

Use **Up or Down** key to set desired water temperature. The temperature setting will be displayed for 5 seconds to confirm your new selection.

Press Prog. key a third time. The display will show FSxx, with "xx" representing the starting hour.

Use Up or Down key to change setting.

Setting filter cycle duration

Press Prog. key a fourth time.

The display will show Fdxx, with "xx" representing the duration in hours.

Use Up or Down key to change setting.

0 = no filtration
24 = continuous filtration

It's not recommended to set this to "0".
**Filter cycle frequency**

Press **Prog**. key a fifth time.

The display will show **FFxx**, with "xx" representing the number of filter cycles per day (up to 4).

Use **Up** or **Down** key to change setting.

---

**Setting economy mode***

This mode allows you to lower the temperature set point of the spa by 20 °F (11 °C) during a certain period of the day.

Press **Prog**. key a sixth time. Use **Up** key to enable the economy mode, the display will show **EP 1** or use **Down** key to disable economy mode, the display will show **EP 0**.

---

**Setting economy start time***

Press **Prog**. key an seventh time.

The display will show **ESxx**, with “xx” representing the starting hour.

Use **Up** or **Down** key to change setting.

---

**Setting economy end time***

Press **Prog**. key a eighth time.

The display will show **EExx**, with “xx” representing the ending time in hour.

Use **Up** or **Down** key to change setting.

*Note that the parameters for the economy mode settings are associated to specific low level configuration of the system that are not present in all software revisions.*
Setting temperature unit

Water temperature can be displayed in either Fahrenheit (°F) or Celsius (°C). Press Prog. key a ninth time. The display will show either °F or °C.

Use Up or Down key to change setting.

Press Prog. key once more to go back to normal mode.
