

Quick Start Card

in.xe-5™ North American version

1- Connect all outputs & keypads

Don't forget that the voltage is determined by the cable used (120 V or 240 V cable)!

2- Connect the main power

2.a- Electrical wiring

For 240 V (4 wires)

For 120 V (*3 wires)

* If connected to a 3 wire system any 240 V components will not work.

WARNING! All connections must be made by a qualified electrician in accordance with the national electrical code and any state, provincial or local electrical code in effect at the time of the installation. This product must always be connected to circuit protected by a Ground Fault Circuit Interrupter (GFCI).

2.b- Heater voltage

Connection for 240 V / heater (4 kW)

Connection for 120 V / heater (1 kW)

The heat.way heater is factory configured 240 V/4 kW (or 2 kW), but it can be converted to a dedicated 120 V / 1 kW by simply switching the cable connection port. Option available on North American models only.

Heat.way specification summary:

- Supports 120 V or 240 V
- Protected by external breaker (not fused)
- Incoloy® or Titanium (optional) heater element for greater protection against corrosion.

3- Select spa configuration (if prompt on startup)

At first startup the keypad display will show **Lx** or **LLx**, where « x » representing the config. number. Some spa packs come with a pre-selected config. and you may skip this step if your system automatically starts up¹.

Use the **Up/Down** key to choose the new low level configuration number.

Press the **Program**² key to confirm the selection.

For more information, see our website: www.geckoalliance.com

¹ **Note:** To re-enter the low level selection menu, hold the **Pump 1** key for 30 seconds.

Note: For the **Color keypad series**, select **Settings menu**, go into **Electrical config** and choose the appropriate Low level.

² **Note:** If the keypad does not have a **Program** or **Filter** key, use the **Light** key instead.

4- Select breaker current

Press and hold the **Program** key for 20 seconds until you access the breaker setting menu.

Note: For the **Color keypad series**, select **Settings menu**, go into **Electrical config** and choose Input current.

The values displayed by the system correspond to 80% of the maximum amperage capacity of the GFCI.

For more information, see our website: www.geckoalliance.com

GFCI	b
60 A	48 A
50 A	40 A
40 A	32 A
30 A	24 A
20 A	16 A
15 A	12 A

(10 to 20 A dedicated to 120 V)

Use the **Up/Down** key to select the desired value. Then press the **Program** key to confirm the selection.

Note: If the keypad does not have the **Program** or **Filter** key, use the **Light** key instead.

Configuration selection chart

Glossary

P1	Pump 1
CP	Circulation Pump
X	Installed
1SP	High speed only
2SP	High and Low speed
(OUT, AMP, Relay, Tab)	Output connector
12A, 12A-4A	Output current: 1 speed or High - Low speed

¹ When the Ozonator is not controlled by a relay, it can be tied to Pump 1 Low speed or Circ. Pump.

² Slave (OUT 1) high and low speed dedicated to Pump 3 and pump 4 respectively
